Beta vs. S&P 500	0.94
Standard deviation	9.9%

AltaVista Recommendation

UNDERWEIGHT

Below average appreciation potential. A rating of UNDERWEIGHT is assigned to funds with ALTAR Scores™ above 3.0% but below 6.0%. Typically, funds in this category consist of stocks trading at relatively expensive valuations and/or having below-average fundamentals.

	ALTAR Scores™

Analyst's opinion

Equal sector weighting aims to systematically avoid the excesses of the cap-weighted benchmark (e.g. Tech bubble, Financial Crisis) making it ideal for "set-it-and-forget-it" investors who prefer somewhat less volatile returns. Profitability is similar to the S&P 500 on average, although it varies from year to year. But tactical investors may want to wait as the index happens to be overweight in some poorly-rated sectors and underweight in highly-rated ones at present.

Valuation metrics

	2017E	2018E
Price-to-Earnings	18.7	16.7
Price-to-Cash Flow	12.4	11.3
Price-to-Sales	1.9	1.9
Price-to-Book Value	2.6	2.4
Yield* (%)	2.4	2.5

*Based on consensus dividend forecasts for underlying stocks. Metrics differ significantly from distribution yield on the ETF.

Historical P/E ratio*

*based on twelve months' forward EPS (max value of 100)

How we rate ETFs

AltaVista Recommendation

For every ETF under coverage, we calculate a rating based on a proprietary scoring system that analyzes metrics such as Return on Equity and Price-to-Book Value multiples. Then, we separate the funds into five tiers based on their individual scores as illustrated by the scale below. Although one fund's score and recommendation are independent of other funds' rankings, our coverage universe has a roughly normal distribution among the five tiers, with NEUTRAL accounting for the largest number of ETFs.

What they mean...

SPECULATIVE

Deeply undervalued but risky. A rating of SPECULATIVE indicates exceptional appreciation potential in our opinion. However, firms in this index may also have deep structural issues, which can carry extra risk. The rating is based on a proprietary scoring system that analyzes metrics such as Return on Equity and Price-to-Book Value multiples.

OVERWEIGHT

Above average appreciation potential. A rating of OVERWEIGHT indicates that stocks in this index are trading at attractive valuations and/or have above-average fundamentals. The rating is based on a proprietary scoring system that analyzes metrics such as Return on Equity and Price-to-Book Value multiples.

NEUTRAL

Average appreciation potential. A rating of NEUTRAL indicates that valuations adequately reflect the fundamentals of stocks in these indices. The majority of indices we cover fall into this category. The rating is based on a proprietary scoring system that analyzes metrics such as Return on Equity and Price-to-Book Value multiples.

UNDERWEIGHT

Below average appreciation potential. A rating of UNDERWEIGHT indicates that stocks in this index are trading at relatively expensive valuations and/or have below-average fundamentals. The rating is based on a proprietary scoring system that analyzes metrics such as Return on Equity and Price-to-Book Value multiples.

AVOID

Not worthwhile for most investors. A rating of AVOID indicates poor appreciation potential. Some indices in this category consist of stocks with little if any history or expectation of profitability, for which our fundamentally-driven analysis may be less relevant. The rating is based on a proprietary scoring system that analyzes metrics such as Return on Equity and Price-to-Book Value multiples.
